**Higher risk**

Potentially lower reward ← → Potentially higher reward

**Risk Disclaimer**

The risk and reward indicator illustrates where the sub-fund is positioned in terms of its possible risk and reward. The higher the sub-fund's position on this scale, the greater the possible reward, but also the greater the risk of losing money. Even if the sub-fund is in the lowest risk class you can lose money as no investments are entirely risk free. The risk indicator is calculated using historical data and therefore cannot be used as a prediction for the future. The risk classification may change over time.

**Why is this Sub-Fund in this category?**

The sub-fund is subject to a medium level of risk as it is exposed to market factors such as global macro-economic trends, currency fluctuations, interest rates fluctuations, inflation and the performance of issuers of securities. At this time the level of the risk and reward profile is equal to 4.

**The risk and reward indicator does not take into consideration the following risks, which can affect the sub-fund:**

**Credit risk** - The possibility that a debtor will not meet their repayment obligations.

**Operational risk** - Which may occur due to technical issues for example natural disasters, misunderstandings and fraud.

**Derivative risk** - Use of derivatives results in higher chances of loss due to the use of leverage, or borrowing. Derivatives allow investors to earn large returns from small movements in the underlying asset's price. However, investors could lose large amounts if the price of the underlying moves against them significantly.

**Emerging markets risk** - In emerging markets the legal, judicial and regulatory frameworks are still developing so there could be, for local market participants and their counterparties, a high degree of uncertainty.

**Sustainability risk** - Which may occur because the Sub-fund does not promote ESG Characteristics and Sustainability Factors and does not maximize portfolio alignment with Sustainability Factors.

Full details of the risks the sub-fund is exposed to are provided in the prospectus.
