Operational risk - Which may occur due to technical issues for example natural disasters, misunderstandings and fraud.

Derivative risk - Use of derivatives results in higher chances of loss due to the use of leverage, or borrowing. Derivatives allow investors to earn large returns from small movements in the underlying asset’s price. However, investors could lose large amounts if the price of the underlying moves against them significantly.

Emerging markets risk - In emerging markets the legal, judicial and regulatory frameworks are still developing so there could be, for local market participants and their counterparties, a high degree of uncertainty.

Conflict of interest risk - The risk of potential conflict of interest for the Investment Manager or any related party in circumstances where the sub-fund may invest in other vehicles where the Investment Manager has a material interest.

Sustainability risk - Which may occur because the Sub-fund does not promote ESG Characteristics and Sustainability Factors and does not maximize portfolio alignment with Sustainability Factors.
