YOUR FAMILY

To help safeguard what matters the most to you, trust a bank that has your best interests at heart.

Private Trusts
Trusts, including Shari’ah compliant trusts, can play an integral role in wealth protection and management for you and your family, particularly in family estate and succession planning control, to also include asset management protection and confidentiality.

Foundations
A variety of foundation structures are being implemented both in the Dubai International Financial Centre (DIFC) and Abu Dhabi Global Market (ADGM), to hold real estate, trading companies and investments. Let us help you establish your foundations in the UAE to protect your assets, with the highest levels of privacy and efficiency.

Asset Holding Companies
We can assist with setting up asset holding companies for your art, jewellery, aircraft, yachts, international property, and image rights.

YOUR BUSINESS

Benefit from our rich expertise and decades-long experience in structuring and managing bespoke solutions for your business.

Investment Holding Vehicles
Bank on our extensive experience with the incorporation and administration of Jersey-domiciled investment holding vehicles, including provision of experienced professional corporate directors and transaction management.

Property Holding Companies
Jersey is a world-renowned destination to hold international property investment via holding structures, and provides high-quality legal, accounting and administrative expertise. Property holding entities can be established quickly and economically through a range of structures that provide the flexibility to meet your requirements.

Jersey Companies for Acquisition
Jersey companies are considered to be proven vehicles for the acquisition of private equity investment, or the option to invest on behalf of a corporate institution directly.
We spare no effort when it comes to understanding your portfolio of global assets and their current ownership. We then develop a strategy with you and your advisors to ensure the smooth succession of those assets, whether for family, a charitable legacy or business continuity reasons.

Your legacy plan can include a specific provision for:

- Inheritance beneficiaries
- In what percentage (according to the Shari’ah or an alternate division of assets)
- At what time (for example, a minimum age before a person can inherit assets)

The plan can also include liquidity planning to ensure sufficient availability of funds, where inheritance taxes may need to be paid. There can also be a specific provision to address the needs of young or vulnerable family members.

Expert planning can help facilitate a smooth succession process in order to minimise family conflict.
